Category:	eml - general bugs	Estimated time:	0.00 hour
Target version:	Beta2	Spent time:	0.00 hour
Bugzilla-Id:	142		
Description			
Need to revise eml-file and eml-variable to more fully support the description of the structure and content of ASCII data files. Need to be able to specify relational constraints among various data entities, possibly using a new module. Need to be able to specify data formats for binary formats on a per-data-entity basis.
