#### Description

I opened an existing package and went to the documentation menu/Access Permissions. I changed the permission so that public could not read the document. when I clicked ok, the display on the main screen was not updated. I then saved the package and the display still wasn't updated, although if I go back to documentation/access permissions it shows that public does not have read access.

I then closed the package and reopened it but the main display still shows that public can read the package. the documentation/Access Permissions dialog is still correct though.

#### History

##### #1 - 04/06/2004 09:03 AM - Dan Higgins

currently (4/5/2004), the Add button on the access dialog appears to do nothing!

##### #2 - 04/08/2004 02:57 PM - Chad Berkley

when you add information using the following menu items under documentation the changes are not reflected in the main data package screen: access permissions.

##### #3 - 04/12/2004 11:50 AM - Saurabh Garg

Done.
