<b>Description</b>			
The data sort funtion only sorts in a descending fashion. You should have the choice of whether to sort ascending or descending.			

History

#1 - 04/05/2004 11:45 AM - Dan Higgins

Actually, the sort function is designed to toggle; i.e. first sort descending, then sort ascending. This does work if one selects a new cell in a column! Error is when the cell selection is not changed!

#2 - 04/06/2004 08:47 AM - Dan Higgins

toggle functionality fixed.
