

Metacat - Bug #1451

null returndoctype fails to return all documents

04/05/2004 04:23 PM - Matt Jones

Status:	Resolved	Start date:	04/05/2004
Priority:	Immediate	Due date:

Target version:	1.4	Spent time:	0.00 hour
Bugzilla-Id:	1451		

Description

When the pathquery "returndoctype" filed is omitted, metacat is supposed to return all matching documents. In fact, no documents are returned under version 1.3.1, because it filters out all documents in the returndoctype listt is empty or null. Fixing this will require chaning the logic in the DBQuery module to include results even when the returndoctype field is not present.

History

#1 - 04/05/2004 04:26 PM - Matt Jones

Fixed DBQuery.java to allow results even when returndoctype is null, as is appropriate behavior. Now, both query fields (returndoctype and filterdoctype) work as originally intended. Fixes checked into CVS.
