

Morpho - Bug #1465

using references in dpw causes duplicate reference ids

04/08/2004 06:13 PM - Chad Berkley

Bugzilla-Id:	1465		

Description

I created a new package with the dpw, and added several contacts/owners/assocParties from other packages as well as adding some manually. When i tried to validate the document, it failed because at least two of the elements had been given the same id. Here is the xml produced:

```
<creator id="1081179008226">
<individualName>
<salutation>mr</salutation>
<givenName>chad</givenName>
<surName>berkley</surName>
</individualName>
<organizationName>NCEAS</organizationName>
<positionName>Programmer</positionName>
<address>
<deliveryPoint>735 State St. #300</deliveryPoint>
<city>Santa Barbara</city>
<administrativeArea>CA</administrativeArea>
<postalCode>93121</postalCode>
<country>US</country>
</address>
<phone phonetype="voice">8054039515</phone>
</creator>
<associatedParty id="1081179008226">
<individualName>
<salutation>mr</salutation>
<givenName>chad</givenName>
<surName>berkley</surName>
...
```

History

#1 - 04/08/2004 06:17 PM - Chad Berkley

this bug only seems to happen when you try to use references to include more than one contact/owner/assocParty. If I just use one, this doesn't happen.

#2 - 04/09/2004 03:00 PM - Dan Higgins

I can reproduce this bug by 'copying' a reference. Apparently the id is simply copied also! (Still need to find the actual code.)

#3 - 04/09/2004 03:42 PM - Dan Higgins

A new ID was not being created when a party reference was edited and copied (as opposed to editing of the reference itself). The fix was to set the 'referenceIdString' in the PartyPage class to null when the choice to copy the info is made. This causes the getRefID method to reset the ID in the copy.
