Description

When you try to export a package to disk in open dialog or search frame, you will get an erro. For export to a directory, the error is "Sorry, Package must be saved before it can be exported!". For export to zip file, it got null pointer exception.

But export function in package frame works fine.

History

#1 - 04/16/2004 01:46 PM - Jing Tao

In ExportComand class, code was added to check the package location before export. The code set location is only done for datapackage frame. So data package works fine for export function. Now package location was set for search frame and open dialog too. So the bug is fixed
