#### Description

Going through DPW RC2. Import taxa from the taxonomic screen doesn't clearly say when or how you import a species table. Something like " If you have already created a species table and have imported into Morpho you can import the list directly into this data package. Otherwise you can upload a species list table to this DP when you are done creating the general metadata." Something a little more specific would be better...it just isn't clear when and where you can upload a species table.

#### History

##### #1 - 12/17/2004 03:34 PM - Andrea Andrea

Also see bug 1567 which is closely related to this one.

##### #2 - 05/27/2005 08:07 AM - Veronique Connolly

This was fixed. Explanatory text was added on the Taxonomic Coverage window of the NDPW and instructions about how to import a table with taxonomic info will be in the FAQ of the user guide.
