<b>Description</b> More examples are needed here...what categories/units/precision are species presence/abscene (e.g. 0 or 1), plot numbers starting from 1...N wher N equals the number of plots in a study, richness (i.e. the number of species in a plot). I try to define richness and then have to associate it with an existing standard unit type which i don't know. This gets very complex...

Is this something that needs to be handled in the documentation? (Dan Higgins)

#2 - 11/11/2010 11:49 AM - ben leinfelder

"Dimensionless" is a good catch-all for units like this.
