Description

This is REALLY a nit. But as I was reviewing this document, I noticed ?? character strings surounding words in several places. Are these MS html tags that eluded Chad when he transformed the document? Just do a search for ? or ?? in the document to find them.....

History

#1 - 04/21/2004 11:32 AM - Matt Jones

This is likely a problem with exporting from word and not replacing the "smart quotes" with a standard character code.

#2 - 04/21/2004 11:45 AM - Saurabh Garg

It was a smart quotes problem. Now fixed.
