Description

Cris Jones reported a problem where data associated with older beta6 data
packages could be displayed (from PISCO metacat) but could not be saved to the
local machine (e.g. downloaded)/

History

#1 - 04/29/2004 12:46 PM - Dan Higgins

The problem was a logic error in the serializeData command in the
AbstractDataPackage class. Data was being moved to the local machine from
metacat (appeared in the metacat cache) but the code didn't look there when
creating a local package! Revised the code to look in the local dir, the temp
dir, AND in metacat for the data files!
