

Metacat - Bug #1542

SQL Server support broken

04/30/2004 08:35 AM - Matt Jones

Status:	New	Start date:	04/30/2004

Target version:	2.x.y	Spent time:	0.00 hour
Bugzilla-Id:	1542		
Description Support for the MS SQL Server database was maintained in versions prior to 1.3 of metacat. Now the xmltables-sqlserver.sql and the associated upgrade*-sqlserver.sql are either not up to date or are missing entirely. Need to port the database changes to SQL Server and test all functions, including upgrades from 1.3 to 1.4 before releasing 1.4.			

History

#1 - 09/21/2004 04:11 PM - Saurabh Garg

Moving the target to version 1.5

#2 - 09/27/2006 05:50 AM - Saurabh Garg

Here are the files which need to be updated:

1. src/xmltables-sqlserver.sql
2. src/upgrade-db-to-1.2.sql
3. src/upgrade-db-to-1.3.sql
4. src/upgrade-db-to-1.4.sql
5. src/upgrade-db-to-1.5.sql
6. src/upgrade-db-to-1.6.sql
7. src/edu/ucsb/nceas/dbadapter/SqlserverAdapter.java (getLeftJoinQuery() needs to be tested)

As we dont have any metacat servers in ms sql right now, I think upgrade scripts (2-6 above) are not important to fix this bug
