Bugzilla-Id:	156			

Description

Need to integrate Dan's new metadata editor as an alternative metadata
editor component to demonstrate the alternative metadata editing interface.
This involves turning the component into a Java Bean and adding new panels to
dmanclient to handle it. This editor will not be feature complete at this time,
but is rather just a demo of the new UI appraoch.

History

#1 - 09/29/2000 01:36 PM - Matt Jones

ok, have added the new editor as a "demo component" and in the process cerated a
new Plugin architecture for hot-pluggable components. As the new editor is
extremely incomplete, we will have to revisit its true integration with mde.

#2 - 04/09/2001 06:07 PM - Matt Jones

Lowered priority because we might drop MDE and replace it with another editing
solution.

#3 - 07/12/2001 10:31 AM - Matt Jones

Completed demo. Have now moved to a new editor code base developed by higgins,
so this bug is irrelevant.
