#### Description

morpho didnt recoginze a time column with format hh:mm:ss, although it let me choose this category for the column. The first value in the column was rather ugly - it had only 1 "h", rather than 2 -- ie, h:mm:ss, before noon. The input table was a ms-excel csv file, ugly yes, but a common input. I dont blame you if you consider this a feature...

#### History

##### #1 - 05/14/2004 04:20 PM - Perumal Sambasivam

For some reason, java doesnt seem to recognize even hh:mm:ss as a Date format. It is able to recognize a full date like "mm/dd/yy hh:mm:ss" but not the time alone.
