

Morpho - Bug #1583

Typos/grammatical errors in "Intro to Metadata" documentation

06/03/2004 10:48 AM - Andrea Andrea

Status:	Resolved	Start date:	06/03/2004
Priority:	Normal	Due date:	
Assignee:	Veronique Connolly	% Done:	0%
Category:	morpho - general	Estimated time:	0.00 hour
Target version:	1.6	Spent time:	0.00 hour
Bugzilla-Id:	1583		
Description			
<p>These are:</p> <p>"Unfortunately, this often means that the value of ecological data diminish over time...": should be "diminishes".</p> <p>"Metadata is the information that describes "who, what where, when, why and how" an ecological dataset...": missing a comma.</p> <p>"...that describe the purpose of the data collection and the questions the data were originally intended to address being collected to address.": take out "being collected to address".</p> <p>"is used for g eographic and spatial metadata": extra space.</p> <p>"In addition, information about potential gaps in data collection or in the collection of some variables.": need to have an end to the sentence, such as "should be included".</p> <p>"The Data Table contains information regarding the data table itself.": should be "The Data Table section contains..."</p> <p>"To use t his tool you first must register.": extra space; register where?</p>			

History

#1 - 12/07/2004 11:43 AM - Veronique Connolly

First paragraph, 3rd line, "descriptive information describing data content...": drop "descriptive".

2nd paragraph, "...on analysis of individual data sets...": change to "datasets" (as used throughout the document).

5th paragraph, "...at a site, identified as VO.": drop the comma after "site".

After Creating Metadata with EML heading, "NOTE: This for non-RDBMS datasets.": add "is" after "This".

9th paragraph, "...date, time and location of data collection; who collected the data sampling design; etc.": need semi-colon before "sampling design".

4th paragraph of "Creating Metadata with EML section", "The information in Table 4 is arranged in six broad metadata categories, each of which contains more detailed metadata. These categories are somewhat arbitrary, but are intended to categorize EML metadata fields in a way that is intuitive to ecologists. The categories include the General Dataset, Geographic, Temporal, Taxonomic, Methods and Data Table Metadata sections."

I would reorganize these sentences like this:

"The information in Table 4 is arranged in six broad metadata categories: the General Dataset, Geographic, Temporal, Taxonomic, Methods, and Data Table metadata categories. These categories are somewhat arbitrary, but are intended to categorize EML metadata fields in a way that is intuitive to ecologists."

7th paragraph of "Creating Metadata with EML section", "...where samples were collected and any spatial or geographic references that may...": add comma after

"collected".

8th paragraph of "Creating Metadata with EML" section, "...(e.g. data was collected every month between June 2002 & 2003)...": replace "data was" by "data were" and replace "&" by "and".

11th paragraph of "Creating Metadata with EML" section, first line, "The Data Table contains information regarding the data table itself.": add "Metadata category" after "Table".

Paragraph in "Morpho" section, " It enables an ecologist to create, edit and manage metadata and data tables.": add a comma after "edit".

#2 - 12/09/2004 03:50 PM - Veronique Connolly

This is something Andrea and I could work on.

#3 - 01/04/2005 12:02 PM - Veronique Connolly

I fixed this.

#4 - 03/27/2013 02:17 PM - Redmine Admin

Original Bugzilla ID was 1583
