Target version:	3.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	1587		

Description

This ecogrid server side data query task. Bug 1586 will implement dataQuery in kepler side (client side, query local data). In task, kepler will send a sql query from kepler to ecogrid node. Ecogrid will excute this query and return partial data object to client.

This bug will be done on the base of bug 1584.

History
