#### Description

Remove Element button seems to work fine when working with a new xml document, but DOES NOT function when the XML document being edited has been loaded from a saved file. Try creating a new document; save that document; and then try to remove any of the nodes to see the problem

#### History

##### #1 - 04/09/2001 06:07 PM - Matt Jones

Lowered priority because we might drop MDE and replace it with another editing solution.

##### #2 - 05/14/2001 09:08 AM - Dan Higgins

MDE no longer part of planned distribution
