Description closed bug 1106 and opened this one to update it. ----- If a data entry field has only one possible value, make it a label or make it non-editable so it doesn't get focus. This will make it easier for user tabbing thru fields

as a first step, have changed drop-down list so that if it has only one value, that value is selected and the list is disabled (therefore does not receive focus when user is tabbing across fields)
