

Kepler - Bug #1635

Update ant build so that documentation appears for new actors

07/12/2004 11:15 AM - Dan Higgins

Status:	Resolved	Start date:	07/12/2004
Priority:	Normal	Due date:	
Assignee:	Dan Higgins	% Done:	0%
Category:	build system	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	1635		

Description

Neither the javadoc nor the actual source code files appear for Kepler specific actors. Also the javadoc does not appear for PTII actors if PTII is built using the ant buildfile. Need to ammend the build file to create javadocs and install source in the correct location so that source and documentation can be seen
