Description

I noticed that we are maintaining a web page regarding SEEK taxon that contains material about the groups activities but that is not included on the SEEK web site. Personally, I think it would be best if we all coordinated our outreach and made it available from the single SEEK web site (which is why we made the new site editable by all project members). Would you be willing to move/convert all materials that are found on the ITCC site (<http://www.itc.ku.edu/SEEK/>) and put them on the SEEK site (probably at <http://seek.ecoinformatics.org/Wiki.jsp?page=TaxonomyAndClassificationWorkingGroup>) to improve the consistency of our outreach? If there are other SEEK taxon sites it would be best if this material was moved as well. Thanks.
