#### Description

We found another documentation error in eml-constraint's "attributeReference" field. The documentation states that the field contains the name of an attribute participating in a key, while in fact it contains the identifier of the attribute participating in the key. I am aiming to fix this for the 2.0.1 release.

#### History

##### #1 - 08/10/2004 02:16 PM - Matt Jones

Fixed for 2.0.1 release. See xsd for new wording of the documentation.

##### #2 - 03/27/2013 02:17 PM - Redmine Admin

Original Bugzilla ID was 1652
