

VegBank - Bug #1654

pdf's don't work in Mozilla on our tomcat site, but do in apache

see ERD for an example of one that doesn't work and http://gyro.nceas.ucsb.edu/vegdocs/workshop/2004/vegbank_overview_pwrpt.pdf as an example of one that does (apache)

an email:

Acrobat problem:

can't view our PDFs from our website with mozilla, but we can when the same doc is not on our site:

http://www.unc.edu/~mikelee/vegbank/vegbank_erd.pdf

<http://www.adobe.co.uk/support/topstech/acrobat/319294/main.html> may have something to say about this.

This makes me think one solution would be to place all pdfs on the apache part of the site? Hmm, this may be so. The following link is ok:

http://gyro.nceas.ucsb.edu/~lee/misc/vegbank_erd.pdf

all pdfs should go on the apache side of things, where they have just been moved, not tomcat. This solves the pdf viewing bug.
