Bugzilla-Id:	1665			

Description

Replacing the current GARP code in Kepler by openModeller will force modifications to the current ENM/GARP pipeline.

Chad sent me the latest version of the pipeline, created during the last BEAM meeting in Sevilleta Field Station in Feb/2004.

I will take advantage of the opportunity and will show the pipeline to Town Peterson so it can be review once more by the field experts.

History

#1 - 04/06/2007 01:37 PM - Dan Higgins

There seems to be no recent call for OpenModeler integration with Kepler and Ricardo has left the project. Thus retiring OpenModeler bugs.
