<b>Description</b>			
We need a new vegbank machine. PMark has spec'd one out: see <a href="http://vegbank.org/wiki/Wiki.jsp?page=VegBankHardware">http://vegbank.org/wiki/Wiki.jsp?page=VegBankHardware</a>			
Need to BUY then SET UP and INSTALL vegbank, etc. on it.			
Then update whatever needs updating so that vegbank.org goes to new machine and current vegbank machine gets a new name. This current vegbank machine will also be our backup server in case vegbank.org goes down.
