

Morpho - Bug #1708

data import wizard crashes when you click finish

09/29/2004 03:21 PM - Chad Berkley

Target version:	1.10.0	Spent time:	0.00 hour
Bugzilla-Id:	1708		
Description several people at the KNB workshop reported that the import wizard crashed when they clicked the finish button causing them to loose all of their input. the error was "cannot find entity". I'm not sure how to reproduce this, but it has been reported by multiple people. after this happens, morpho itself does not crash but it also does not work correctly after this happens.			

History

#1 - 12/03/2004 10:16 AM - Veronique Connolly

This also happened to me the first time I created a data package. I had just downloaded Morpho onto my computer and started using it. This problem never happened to me again and I've created several new data packages since. Could this problem be related to the fact that it's the first time you use the NDPW?

#2 - 01/04/2005 12:04 PM - Veronique Connolly

I tested that on 3 PCs and a Mac on which Morpho 1.5.1 was installed for the first time, and the NDPW didn't crash.

#3 - 05/26/2005 12:42 PM - Saurabh Garg

There is no fixed way to reproduce this. So changing the milestone for this bug to 1.7
Also this bug might have been fixed in Bug# 1799

#4 - 01/18/2013 10:18 AM - ben leinfelder

I have not seen this behavior in the modern generation of Morpho (last 5 years).
