Description

Mike Finch from the CanopyDB project developed a plugin for Morpho that imports
MS Access databases and creates the metadata that can be extracted from the DB.
Need to integrate this plugin into the next release, and test. In particular,
need to be sure it is only loaded on the Windows version of Morpho if in fact it
only works there.

History

#1 - 12/17/2004 01:03 PM - Matt Jones

This plugin is complete -- someone just needs to talk to finch about
incorporating the source into morpho and shipping it withthe release. He's
approaved the idea already.
