Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	1727		
Description IPCC current climate data is in a format with the data averaged by month and all 12 months arranged sequentially in a single file (for a given climate variable). There is thus a need to reformat and process the data into a ascii raster format (grass gis standard) with the data as annual and seasonal averages (rahter than monthly) Responsible Party: Higgins
