<b>Description</b>			
With Trevor, decide on fixed version of TCS to code against for next development cycle. Fix "anytype" fields to a standard group of fields.			

### History

#### #1 - 11/08/2004 09:06 AM - Robert Gales

My opinion is that we use the version proposed at TDWG (v0.85) and just replace the "placeholder" types with the corresponding piece of XML schema from version v0.81 (the latest version prior to the use of any or placeholder types). This will cover all the current placeholders except (DataSet/Vouchers/Voucher/Collection), which we can leave as a placeholder for now.

#### #2 - 11/22/2004 01:18 PM - Aimee Stewart

Decided on the Taxon call of 17 Nov that we are unable to pin this down much more

before spring 2005. We will work from v0.85 that Trevor put together for now. Possibly there will be a few additional modifications that will be made before this version is tagged.

#### #3 - 11/29/2004 10:16 AM - Aimee Stewart

We are now deciding between version 0.86 and 0.88 - the differences are minor and confined to the Placeholder type which allows for future modification. This must be resolved, but for the purposes of development, we can carry on.

#### #4 - 12/13/2004 12:50 PM - Aimee Stewart

We have settled on version 0.88 - this will work fine for the next development cycle.
