

Metacat - Bug #1768

Javascript error in "include_searchbox.jsp" for default skin

11/12/2004 03:13 AM - Owen Jones

Description

Clicking on the common search terms produces an "error on page" (Line: 1, Char: 1, Error: Object expected, Code: 0, URL: <http://localhost:8080/test1/index.jsp>)

I found that if I replace:

```
"<a target="_top" href="javascript:keywordSearch  
(document.searchForm, 'alpine')" class="searchsubcat">Alpine,</a>"
```

with:

```
"<a href="#" onClick="keywordSearch(document.searchForm, 'alpine')"  
class="searchsubcat">Alpine,</a>"
```

It works fine.
