

Morpho - Bug #1775

Some saved searches do not work a second (or more) time

11/18/2004 04:45 PM - Andrea Andrea

Target version:	1.6	Spent time:	0.00 hour
Bugzilla-Id:	1775		

Description

It seems that some saved searches work (meaning when you click on the saved search, it performs the search again and gives you the results), while others do not work (it appears that nothing happens, and there are 0 data sets in the results box). It is unclear why some work and others don't.

We tried one search for "primates" on local and network, and when saved it would not work again, but a saved search for "monarch" did work again after being saved.

Veronique discovered this bug.

The saved searches work unless you close Morpho. When you close it and re-open it, the only data packages that will come out of the saved search are the ones that you saved locally (even though you are logged into the network).
