Bugzilla-Id:	1781		
Description			
In the Data table panel, you can't delete a data table that has column headers, but doesn't contain data (it has empty beige cells). If you go under the Data menu, the Delete Current Datatable option is not available.			

History

#1 - 12/07/2004 03:09 PM - Veronique Connolly

However, if you right-click on such a data table, the "Delete Current Datatable" option is available.

Select a data table column (in Morpho) with no data in it. Choose delete column. The column header is deleted but the data from that columns in the table is misaligned afterwards. I deleted three empty columns and now the values from that point on do not align right.

#3 - 06/02/2010 11:54 AM - ben leinfelder

any data entity (dataTable, otherEntity, etc) can now be deleted even if the actual data is not loaded/visible (as is the case with this bug).
