

VegBank - Bug #1788

Upload to VegBank doesn't work

11/26/2004 12:48 PM - Michael Lee

Status:	Resolved	Start date:	11/26/2004

Description

The upload to vegbank feature isn't working.

At one point, the files went:

/tmp/UPLOADS

then to /usr/vegbank/upload/tmp

Neither location has the files that Tim uploaded to me, nor the test uploads that I did. This upload feature should SAY that upload failed if it didn't succeed, too. This is embarassing, as I now have to ask him to upload once again.

History

#1 - 12/02/2004 09:22 AM - P. Anderson

Oh yes it does!

#2 - 12/02/2004 01:11 PM - Michael Lee

it doesn't work again. Tested with 40MB file and got the following result:
(seems to have worked, but not in dir that it should be in on vegbank)

file max size limit (in bytes): 200000000

filename: b4_test_import_from_anotherVBr_vegbranch-v1.5b.mdb

file length: 41013248 bytes

#3 - 12/12/2004 08:35 PM - P. Anderson

Not only does it work (again), but now we get alerted when there's an error (and sometimes even when there isn't!)
