Description

Currently, only dataTable data types can be properly added to a data package,
using the Data Table Wizard (other data types can be added, but as a hack).
There is a need for support for adding data types other than dataTable, such as
gifs, jpegs, pdfs, etc. Maybe an attach feature would be useful, or other
wizards for these other types of files where you can add the data file, and the
metadata specifically relevant to that data type.

Blocks Morpho - Bug #4365: New feature for creating otherEntity	**Resolved**	**09/03/2009**

History

#1 - 06/02/2010 11:50 AM - ben leinfelder

otherEntity import can be used for most data files.
Things like stored procedures or spatial data files would be the next kind of data to import via a wizard.
