

Metacat - Bug #180

return of DTD comments with documents should be eliminated

01/08/2001 12:07 PM - Dan Higgins

Status:	Resolved	Start date:	01/08/2001
Priority:	Normal	Due date:

Target version:	Release1.0	Spent time:	0.00 hour
Bugzilla-Id:	180		

Description

Currently, if I submit an XML metadata document to Metacat and then retrieve that document, the retrieved document contains comment fields from its DTD that were NOT present in the original document. A user should retrieve a document from metacat that is a duplicate of the one submitted and comments in the DTD should remain in the DTD only. Putting them into a returned document tends to confuse the user into thinking that the retrieved document is not the same one as submitted.

History

DONE

When comments are reported in DBSAXHandler, processingDTD flag is used to eliminate storing of the comments coming from the DTD file
