export somewhat stalled now. Currently have added NPS-entry tools, but not yet
migration into VegBranch. Should be able to grab some of that from the
NPS-importer, but version 1.1 and 2.0 means this may be more complex than necessary.

come up with several formats that would be helpful: PC-Ord? Data originating in
vegbank module. VegetWeb and TurboVeg would also be nice

#3 - 07/22/2005 08:26 AM - Michael Lee

not so urgent

#4 - 09/06/2006 09:07 PM - Michael Lee

not hugely important right now.
