Morpho - Bug #1820

Smart quotes displayed improperly

12/08/2004 12:52 PM - Andrea Andrea

Status:	Resolved		**Start date:**	12/08/2004
Priority:	Normal		**Due date:**

Bugzilla-Id:	1820			

Description

When the " symbol is pasted in from an application like Word (which could occur when pasting in an abstract for example), the word in quotes is displayed as

&ldquoword&rdquo

instead of "word". This does not happen when the " symbols are typed in. This may be related to Bug 1516.

History

Jing fixed this bug which is similar to bug 2517. I Tested it both using the online form and Morpho, submitting data sets to Metacat. I tested pasting in MS Word smart quotes, and they display correctly now.

This bug has been fixed (base on callie's testing). Here are somethings i did:
1)Use ServletOutputSteam to replace PrintWriter to send response of read and query actions. So Java wouldn't encode the special characters.
2)Fix a bug in normalize method in MetacatUtil class - it will encode special characters.
3)Fix a similar bug in normalize subroute in register-dataset.cgi.
