History

- Coal Oil Point Reserve: add "UCNRS" after to stay consistent with other UCNRS sites
- Ecology Research Center vs. Ecology Research Center Miami University: should these be separate entries? Lat/long coordinates are almost identical.
- Bodega Marine Reserve UCNRS vs. Bodega Bay Marine Laboratory and Reserve
- Hastings Natural History Reservation UCNRS vs. Hastings Natural History Reservation
- Kendall-Frost Mission Bay Marsh Reserve UCNRS vs. Kendall Frost Marsh Reserve
- Quail Ridge Reserve UCNRS vs. Quail Ridge Reserve
- Scripps Coastal Reserve UCNRS vs. Scripps Coastal Reserve

Fixed the typos and removed "s" from Whittaker's Forest as it was resulting in an error during XML parsing.

Not sure about dual entries in the list. The entries are most probably from two different sources (UCNRS and LTER I think). Some users might like to see

UCNRS in the name and some users might not. Also some of the coordinates are not exactly same (usually difference is less than .01 degree). I think Dan created this list and would know where the coordinates were taken from.
