#### Description

we need a user level handbook for kepler with good examples of common things people want to do...like loops, ifs, exception throwing/catching, monitoring values, etc. This is extremely important if we want domain scientists to be able use kepler and get into it the first time they see the app.

#### History

##### #1 - 07/05/2005 02:26 PM - Chad Berkley

we decided to postpone this at the june 05 kepler meeting

##### #2 - 12/13/2007 04:24 PM - Dan Higgins

Documentation is well underway. Reassigning to Kirsten ([kma500@hotmail.com](mailto:kma500@hotmail.com)).

##### #3 - 02/01/2008 02:08 AM - Matt Jones

Documentation needs to be packaged as PDFs for the RC1 release and the links for the User Guide and Actor Reference manual need to be added to the documentation page (introScientists.htm, which should be renamed).

##### #4 - 02/04/2008 01:02 PM - Chad Berkley

retarget to 1.0

##### #5 - 02/04/2008 01:15 PM - Chad Berkley

User documentation has been created and is now part of the kepler release. any further bugs about this issue should be opened in new, individual bugs.

##### #6 - 03/27/2013 02:18 PM - Redmine Admin

Original Bugzilla ID was 1838
