#### Description

The following happened for data packages obfs.174.3, obfs.302.3, obfs.66.3, obfs.346.2, obfs.138.4, and nrs.158.7:

If you open one of those dps from the network, select "Export..." on the File menu, and click "Export", you get a message ("Sorry, Package must be saved before it can be exported!") instead of the "Export Datapackage to Selected Directory" window. If you single-click (to select) one of those dps from the resultset, right-click, and select Export, you get the "Export Datapackage to Selected Directory", but when you click on Save you get a message saying "Package has not been saved! Unable to export!"

I tried doing the same thing with the following dps and everything was normal: knb.157.4, ces\_dataset.116.1, nceas.142.4, obfs.418.1, nrs.211.1, obfs2.439.1.

It seems to be a rule that for obfs. and nrs. dps, the bug doesn't happen for dps whose docids end with ".1".

#### History

##### #1 - 07/29/2010 11:27 AM - ben leinfelder

would like to verify that this is still happening

##### #2 - 01/17/2013 01:51 PM - ben leinfelder

Tried this on trunk (upcoming morpho 2.0.0) and it works as expected.
