

SEEK - Bug #1852

ENM IIIH - Actors for grid logical and math operations

01/04/2005 11:12 AM - Dan Higgins

Status:	Resolved	Start date:	01/04/2005
Priority:	Normal	Due date:	
Assignee:	Dan Higgins	% Done:	0%
Category:	beam	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	1852		
Description			
Summarizing the results of multiple GARP calculations will require logical (AND/OR) and math operations on multiple grids (occurrence prediction grids). WE may be able to use ImageJ code as the basis of such actors.			

History

#1 - 03/01/2005 10:36 AM - Matt Jones

Reassigning BEAM-related Kepler issues to Dan.

#2 - 08/17/2005 01:37 PM - Dan Higgins

Two actors, Grid Reset and MergeGrids can be used to carry out most operations of interest. I will close this bug and open new ones as needed if specific cases occur where these actors are insufficient.
