

Metacat - Bug #186

add web metadata entry form for Metacat

04/09/2001 12:17 PM - Matt Jones

Status:	Resolved	Start date:	04/09/2001
Priority:	Immediate	Due date:	
Assignee:	Matt Jones	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.4	Spent time:	0.00 hour
Bugzilla-Id:	186		
Description			
Discussed need for a web-based metadata entry form. Nottrott has a simple form which is a starting point, and has agreed to work with higgins on this task.			

History

#1 - 05/10/2001 12:04 PM - Matt Jones

Added cjones to cc list because he has agreed to work on this as well.

#2 - 05/10/2001 12:12 PM - Matt Jones

Rudolf -- could you check in your current metadata HTML form and the perl script that processes its contents so Chris can examine it and look at extending it for XML output?

#3 - 06/05/2001 02:42 PM - Matt Jones

Reassigned to cjones who is working on a web form that uses the new Metacat.pm perl module to communicate with metacat. See the "webmdentry" CVS module for current progress.

#4 - 10/16/2001 10:44 AM - Chris Jones

have begun cgi framework using the template-toolkit module for the separation of logic from presentation.

#5 - 02/12/2002 04:03 PM - Matt Jones

Moved issues that we do not intend to address during the current release to the 'Postpone' milestone.

#6 - 03/30/2004 02:06 PM - Matt Jones

FIXED. The current source for this feature is in "src/perl/register-dataset.cgi" and the templates are in "lib/style/common/templates". Many bugs and enhancements are still outstanding (filed under the "registry" component), but the basic functionality is there.
