Target version:	Release1.0	Spent time:	0.00 hour
Bugzilla-Id:	189		
Description			
Need to have less than, greater than, and numeric equals operator support in the pathquery language so that we can do spatial and othe rimportant queries.			

History

#1 - 07/17/2001 11:07 AM - Jivka Bojilova

DONE

Included new terms in pathquery.dtd for searchmode:

equals (former "matches-exactly")

isnot-equal

less-than

greater-than

less-than-equals

greater-than-equals

added support for them in QuerySpecification. Tested in Oracle.

For = and != operators: ='1' and =1 (!='1' and !=1) work in the same way for numeric operands thus ='operand' is used only.

For >, >=, <, <= check for numeric operand is added like:

if (operand is Number)

operator operand

else //character operand

operator 'operand'
