<b>Bugzilla-Id:</b>	1890		
<b>Description</b> Modify the db actor to populate the query builder schema and use it through the look inside option. Find out how to access MS Access schema in java (Michael Finch?).			

History

#1 - 02/25/2005 05:00 PM - Efrat Jaeger

Requires additional design of the Database connection and query components and a notification when all authentication parameters have been set to connect to the database and populate the schema information.

#2 - 10/17/2005 11:06 AM - Efrat Jaeger

Query builder is now available through the the generic db query actor. Still need to find out how to to access MS Access schema in java.
