

Kepler - Bug #1895

remote actor repository

01/20/2005 11:34 AM - Jing Tao

Target version:	1.0.0beta1	Spent time:	0.00 hour
Bugzilla-Id:	1895		
Description We decide we will put some actors in remote repository in order to reduce the kepler deployment size. Currently, the search in actor panel(left panel) in kepler only search local actors. So we need make the search of actors can be done in both local kepler and remote repository.

History

#1 - 11/02/2005 12:51 PM - Matt Jones

Initial experimentation with using EcoGrid for remote repository is successful. Need to try to deploy at least one EcoGrid service that can be used this way with LSID support.

#2 - 03/22/2006 03:34 PM - Chad Berkley

The repository is now working. we are working on creating a web service (ecogrid) interface for registering lsids. once that is complete, kepler just needs to use the service to handle lsid conflicts when uploading actors to the actor repository.

The actor repository currently lives on dana.msi.ucsb.edu. It needs to be moved to a production server by rel 1.0.

#3 - 04/26/2006 01:44 PM - Chad Berkley

The remote repository is now working with web services. The new permanent url is library.kepler-project.org. Currently, you may upload actors via the kepler interface, but you may not search or download. To search or download you must use the web interface.
