Bugzilla-Id:	1912		

Description

The ImageJ actor needs to be better integrated into Kepler. Currently, the control/menu screen is just opened from ImageJ code and multiple copies may appear if not explicitly closed. Also, closing one of multiple images sometimes crash kepler.

History

#1 - 02/09/2005 01:18 PM - Dan Higgins

The code for interacting with ImageJ has been cleaned up and bugs fixes. It seems to be more stable now and multiple copies no longer appear.
