

VegBank - Bug #1943

need to put "VB" in accessionCode into a props file

02/03/2005 12:46 PM - Michael Lee

Status:	Resolved	Start date:	02/03/2005

Target version:	1.1.0	Spent time:	0.00 hour
Bugzilla-Id:	1943		
Description current is in: Utility.getAccessionPrefix() public static String getAccessionPrefix() and is based on database name. Need to make sure any other instances of hard-coding "VB" goes through this, and this function then reads from the props file instead of the logic based on db name.			

History

#1 - 02/10/2005 04:10 PM - P. Anderson

Utility.getAccessionPrefix() reads from vegbank.accession.prefix in
vegbank.properties now

#2 - 03/27/2013 02:18 PM - Redmine Admin

Original Bugzilla ID was 1943
