

Metacat - Bug #197

revisionid should be generated on client, not metacat

04/09/2001 12:59 PM - Matt Jones

Status:	Resolved	Start date:	04/09/2001
Priority:	Immediate	Due date:	
Assignee:	Jivka Bojilova	% Done:	0%

Target version:	Beta2	Spent time:	0.00 hour
Bugzilla-Id:	197		

Description

Currently metacat assigns a revisionid when allowing updates of metadata documents. This should be changed so that the client specifies the right revisionid. If a client specifies a revision that is less than the revision stored on metacat, the operation must fail with an appropriate error message (the client can then retrieve the recent revision and resubmit). This requires parallel changes in Morpho.
