## History

**#1 - 02/10/2005 02:11 PM - Michael Lee**

how to do this, when to do this?

**#2 - 02/10/2005 04:32 PM - Michael Lee**

load USDA2005, then correlate to USDA 2000, and correlate to any FNA, other
stuff. Bob provides data package. May need to add views to allow people to see
this once it's in VegBAnk. Bob and others will describe what those views are.

**#3 - 09/11/2006 05:05 PM - Michael Lee**

The VegBank International Party Perspective is an idea to allow the "current" view of data, which would let users off the hook for selecting multiple
international standards. This assumes that we can customize views for party perspectives for users, and that we have some idea of how to pick a
standard for lots of different sets of taxa in many places.
