Bugzilla-Id:	1980		

Description

If you query data package nceas.177.4 on the KNB web site or the NCEAS Data Repository, you will notice that the information in the Contacts and Keywords columns is duplicated (in the original document, each keyword is provided only once). This also happened for some dps that I created (have since been deleted from network).

History

#1 - 02/15/2005 08:19 AM - Saurabh Garg

I checked the enteries in xml_index table and this is because of duplicate enteries in xml_index table. So there is a bug somewhere which results in duplicate enteries for some documents in xml_index table.

#2 - 09/27/2006 06:40 AM - Saurabh Garg

Not able to reproduce this bug. Might already be fixed.

#3 - 03/27/2013 02:18 PM - Redmine Admin

Original Bugzilla ID was 1980

#4 - 04/10/2013 11:23 AM - ben leinfelder

- Status changed from New to Works For Me

Searching for "Latitudinal Extents of New World Mammals" shows the single document with no duplicate indexed values.
