

Metacat - Bug #20

DBSAXNode constructor can be simplified

06/12/2000 06:51 PM - Matt Jones

Bugzilla-Id:	20		
Description DBSAXNode now takes a DBSAXNode rootnode and a DBSAXDocument currentDoc as part of the constructor. But really we only need to pass the DBSAXDocument and add get and set routines for getting the rootnodeid (which is stored in the document) to the DBSAXDocument class because it already contains the rootnodeid information that we need.
