<b>Description</b>			
Morpho Plugin for Field Data-Collection Admin			
1) Form generation:			
a) basic requirement:			
Add a 'Generate form' menu option, so user can browse EML data sets (local or metacat) in morpho; which passes the current doc to the UI Generation code, and the resulting XUL is saved somewhere (in profile?) for later download to a tablet			
User can also go thru' DP wizard and create a new dataset to use as the basis of UI generation - after creating document, proceed as above
